## X-GUARD® CONTOUR

X-Guard is a complete range of machine guards designed to comply with the Machinery Directives 2006/42/EC which placed new demands on permanent guards from 29 December 2009. With its wide range of standard components and accessories, X-Guard is guaranteed to cover all possible machine guard applications. X-Guard was launched in 2008, since then new panel sizes have been added. We listen to our customers to enable us to develop the range as new needs arise.

We have now released a new product, X-Guard Contour. A machine guard with round corners that is not only perfect for tight spaces, but also has a very pleasing design.

The panels are available in three different heights 1300, 1900 and 2200 mm and in two different angles, 45° and 90°.

The standard colour is RAL 9011 but the panels can also be tailored to specific customer requirements.

### X-GUARD® CONTOUR

- 2006/42/EC
- 1300, 1900 and 2200 mm
- RAL 9011
