# PROJECT BRIEF

Salesperson: George Ives  
[george@bristol-storage.co.uk](mailto:george@bristol-storage.co.uk)

Continuing our relationship with SPIE, we were asked to provide a competitive quotation for a single skin steel building in an area at a local aircraft manufacture. Enabling them to have a new Team Centre Office. Having worked with SPIE before they were confident we could complete the job to the standard required therefore won the contract.

“  
The fact Bristol Storage have the Safe Contractor seal of approval give us the confidence in quality and service.  
”

## WHAT WE SUGGESTED

We suggested a double skin office with a suspended ceiling – 9 office compliant LED lights with on off sensor. - New Mitsubishi Electric Air Conditioning Systems 1 x 3.5kw 600 x 600 ceiling mounted heat pump inverter system.

This was the best for SPIE, we were able to provide everything they needed so that didn't have to go to external companies Lighting, Air-conditioning.
