

PHARMACEUTICAL MANUFACTURER

Case Study

CUSTOMER COMMENTS

"I contacted BSE UK, as I wanted to maximise the little space I had left in the warehouse.

George came to site and told me what options I had, he was very knowledgeable and provided me with brilliant information on what benefits the various different products would give me.

BSE UK also offered good ideas to maximise pallet locations, like adding single pallet racking bays to the end of the cart push back system."

North Devon

PROJECT BRIEF

Salesperson: *George Ives*
George@bristol-storage.co.uk

With their warehouse running at 90% capacity, there was an urgent need to gain more storage from the little space they had left. BSE UK were invited in to measure up and provide an efficient system in order to maximise the available warehouse space and increase the number of pallet locations.

PRODUCTS USED

2 Deep Cart Push Back Pallet Racking

Frame Size - 5500 mm high x 2550 mm deep

Accessories - Push back Carts

Layout - 1 off block 21 wide x 2 deep x 4 high
