

VEETEE RICE

Case Study

CUSTOMER COMMENTS

"BSE UK have been professional and flexible, Dennis was able to provide the level of service we expected and more. The project ran smoothly and was controlled by BSE UK, any problems were resolved by them quickly and efficiently.

We have already placed further orders with BSE UK for works in other parts of our warehouse, and other sites."

THE COMPANY

Veetee Rice was founded in 1987, from then on it has been one of the UK's largest rice suppliers. They supply rice to major supermarkets and to over 50 countries worldwide. Having won multiple awards over the last 10 years Veetee are recognised as a key player in the international food market.

PROJECT BRIEF

Salesperson: Dennis Ives
Dennis@bse-uk.co.uk

BSE UK were asked to supply, deliver and install Pallet Racking and Live Storage within a new area in Veetee's Rochester storage and distribution centre. Gaining as many pallet locations as possible within the space.

PRODUCTS USED

This project included a mixture of AR Adjustable Pallet Racking and live storage giving the customer 3974 pallet locations.

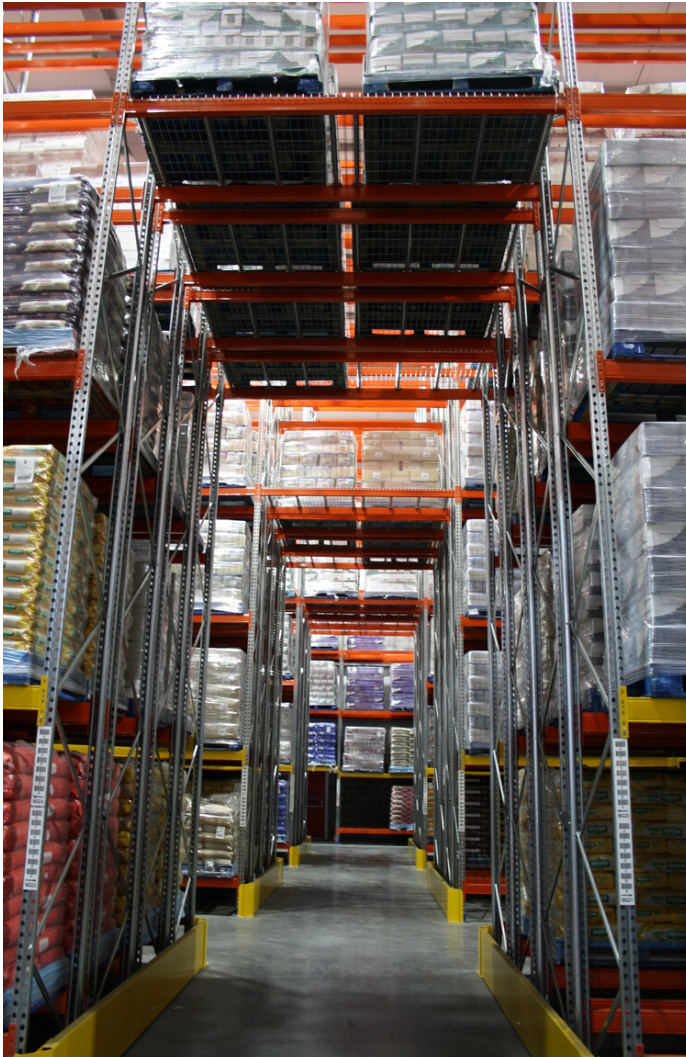

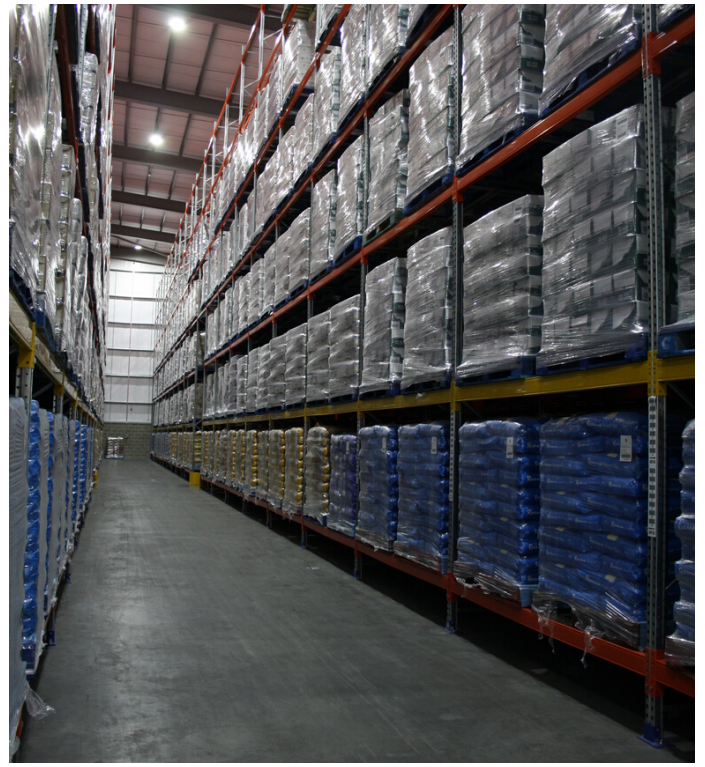

In order to gain as many pallet locations as possible height was utilised with 11.5m uprights. In order for this warehouse to be completely functional in correlation with an existing warehouse a walk through pallet bay were installed allowing storage of pallets above the walk through aisle.

There was also a section of live storage installed at the loading bays to assist with deliveries and collections. There was also restricted height locations, these were marked with yellow coloured beams.
