

DAIKIN - MEZZANINE FLOOR

Case Study

CUSTOMER COMMENTS

"Working with BSE UK previously we knew what to expect, the service was quick and efficient from quote to installation.

They were able to provide us with a mezzanine floor solution that fixed our storage problems and allowed us to keep the existing floor space and storage layout.

We would not hesitate to use BSE UK for any future projects or to recommend them to anyone looking for any storage requirements."

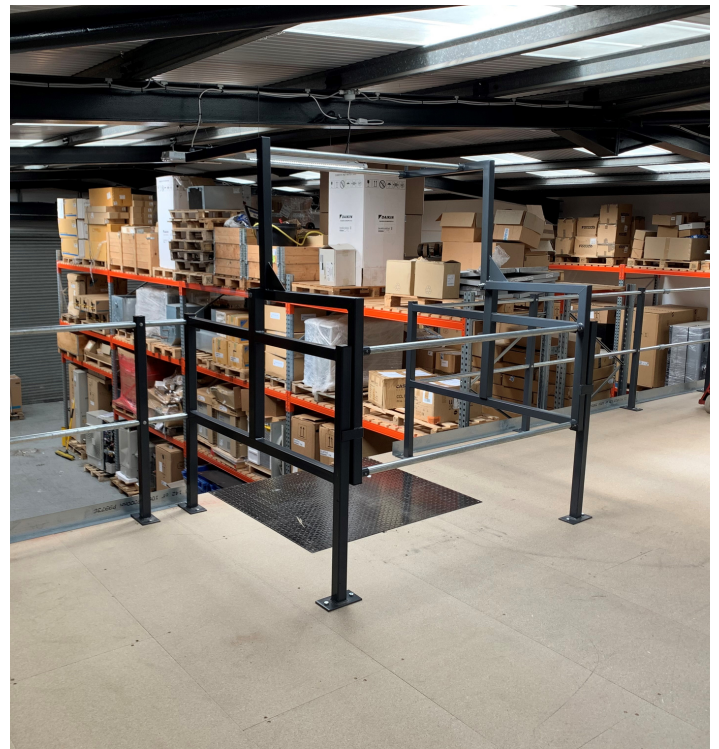

DAN BLANCHARD, DEPOT MANAGER

PROJECT BRIEF

Salesperson: George Ives
george@bse-uk.co.uk

BSE UK were contacted by Daikin to help provide a solution for more storage space using the already limited space they had in their warehouse.

Daikin had been looking at options to rent out another warehouse space for storage. BSE UK were able to provide a mezzanine floor solution over an existing shelving and caged area allowing additional storage whilst maintaining useable floor space below.

PRODUCTS USED

- Mezzanine floor with a Total Floor Area of 132.24 m2
- one standard staircase
- Building Regulation Application

BSE UK made the application on the behalf of our client using an Approved Inspector, including all required drawings, structural calculations and all correspondence.
